Zoey Bench

DESIGNER Elisa Ossino

MADE IN ITALY

Zoey Bench is a bench designed by Elisa Ossino for Dieffebi. Its soft aesthetics, harmonious proportions and welcoming geometry define a discreet and elegant presence. Zoey Bench can be configured with a backrest, offering superior comfort that makes it particularly suitable for reception rooms, waiting areas and institutional environments.

WELL-BEING AND ENVIRONMENT › "Green" design in accordance with LEED ® standards, to design and furnish environments with high sustainability content

END OF USE › At the end of the product's life cycle, we recommend—wherever possible—separating the various components by material to facilitate raw material recovery and recycling processes. If separation is not feasible, do not dispose of the product in the environment; please contact your nearest waste collection or disposal center.

GUARANTEE › Dieffebi S.p.A. ensures that the product is manufactured using high-quality materials and advanced technologies. The company shall not be held liable for any damage to persons or property resulting from improper use or use not in compliance with the provided instructions.

INSTRUCTIONS FOR USE

› Please read the instructions carefully before using the product. Keep them in a safe place for future reference.

› **Instructions for Use**
The product must be used exclusively for its intended purpose—sitting indoors—and in accordance with standard duty of care. Improper use (e.g., using it as a ladder, sitting on the armrests, or applying excessive and unbalanced loads) may result in a risk of accidents. In the event of incorrect use, there is a danger of material damage and/or personal injury.

› **Precautions**
To ensure long-term safety, periodically check that all fasteners and connection elements are properly tightened.

CARE AND MAINTENANCE

Fabrio Surfaces
› To preserve the appearance and durability of textile upholstery, regular cleaning is essential. Accumulated dust and dirt can deteriorate the fibers; we therefore recommend weekly vacuuming at a low suction setting. Non-greasy stains can be treated by gently dabbing with a clean, lint-free cloth or a well-wrung sponge dipped in warm water. If necessary, use a soap solution or water mixed with liquid dish soap (see formulas). Subsequently, rinse the area with clean lukewarm water. For greasy stains, dry spot removers may be used, strictly following the manufacturer's instructions. In case of doubt, always test the product on a concealed area and wait at least 24 hours to check for any alterations.Formulas:

- Soap solution: 0.25 dl (25ml) of soap flakes per liter of hot water; allow to cool before use.
- Dish soap solution: maximum 1 teaspoon of detergent per liter of water.
- Concentrated detergents: add only a few drops per liter.
